The recycling garbage can for small electrical appliances

Rhein-Hunsrück Entsorgung offers all municipalities and interested companies a specially equipped garbage can. Here, among other things, small electrical appliances such as hair dryers, cell phones and electric toothbrushes can be collected.

The current locations of the recycling bins and a listing of all collection points for electrical scrap in the Rhine-Hunsrück district can be found on our website:
www.rh-entsorgung.de

Problem waste / hazardous waste

These wastes contain substances that are hazardous to health, air, water, explosive and/or combustible, or contain or can produce pathogens or may contain or produce pathogens of communicable diseases.

Problem waste can only be handed in at the problem waste vehicle.

You can find the dates for your municipality on your individual waste calendar or on our website:
www.rh-entsorgung.de

Paper garbage can- simple, practical, clean

The blue garbage can is designed to collect paper and cardboard to feed them into the recycling system.
In this way, as much waste as possible can be recycled for new products.
Through the use and further expansion of the blue garbage can stable fees and a sustainable recycling management can be ensured.

Garbage can too small? - No problem, order an additional container or bring your paper waste to the recycling center.

You can obtain **blue and yellow sacks** only at the district, municipality or city administration on presentation of coupons.
If you do not have a suitable garbage can, they can be obtained from the RHE under **0 67 63/ 30 20 40** can be requested.

The yellow garbage can - since 2022 with us in the district

On behalf of the Dual Systems, in our district the RHE empties and collects the yellow bin/ the yellow sack in our district.

If, exceptionally, the yellow garbage can is not sufficient, transparent bags can be purchased in stores and added to the yellow garbage can.
Opaque plastic bags will not be taken along!

Organic waste garbage can- our energy garbage can

In November 2021, we inaugurated our own biogas fermentation plant and have established ourselves with an innovative technology that puts us at the Europe with an innovative technology:
With a special combination of
and digestion technology, we are breaking new paths in biowaste treatment -
such a plant is only available
in Kirchberg!
Please do not use compostable plastic bags use! - Disruptive material!

Residual waste bin - the name says it all

This is because the waste that is not to be recycled, according to the Recycling Management Act, waste for disposal, i.e. residual waste.

The provision fee for the residual waste garbage can already includes the costs for 4 compulsory emptying operations.
Each additional emptying is charged.
